Locality

The company's machining workshop site is located in Apprieu, a town in Isère (38), near Lyon/Grenoble, in the Auvergne-Rhône-Alpes region (France).

Ideally located on the edge of the A48 motorway, the company is fortunate to be able to benefit from a dedicated space within the existing premises of its partner:

> the **SEGEPO** group

Machined material

FERROUS: steel, casting, stainless steel

NO-FERROUS : *Aluminum, copper, brass*

PLASTICS : *PEHD, PA6 PEEK, ABS, PC*

OTHER ALLOYS : *Titanium, Inconel*

*Non-exhaustive
list*

Machining capacity

Milling > *maximum theoretical*

✓ **1400x500x400 mm** / 55,1 x 19,7 x 15,7 inch

Turning > *maximum theoretical*

✓ **Block work : Ø330 x 500mm** / Ø13 x 19,7 inch

✓ **Bar work : Ø64 x 1000mm** / Ø2,52 x 39,3 inch

Qui sommes-nous ?

MECA 8760 is a family company (SASU), created in March 2022. Constituted by **GARCEAU Joris**, experienced industrial technician, it offers these services for the manufacture of industrial products, in particular parts requiring to be manufactured in "**machining / bar turning**", due to their high level of quality requirements (surface conditions, dimensions, volumes, etc.)
